A stroke is a result of low oxygen or low blood flow to an area of the brain. This can happen from a blood clot causing a blockage of blood flow (ischemic stroke), a leak in a blood vessel, or a burst blood vessel (hemorrhagic stroke). Blood carries oxygen to the tissues of the brain, and when blood ...

Dehydration (hypohydration) is the removal of water (hydor in ancient Greek) from an object. Medically, dehydration is a serious and potentially life-threatening condition in which the body contains an insufficient volume of water for normal functioning.. The term "volume depletion" is similar to dehydration, but it refers to the loss of salts as well as water.

Drug addiction is a brain disease. Although initial drug use might be voluntary, drugs of abuse have been shown to alter gene expression and brain circuitry, which in turn affect human behavior. Once addiction develops, these brain changes interfere with an individual's ability to make voluntary decisions, leading to compulsive drug craving, seeking and use.

Diarrhea is the passage of loose or watery stools occurring three or more times in a 24-hour period. The three types of diarrhea are: acute diarrhea, persistent diarrhea, and dysentery. If an episode of diarrhea lasts less than 14 days, it is acute diarrhea. Acute watery diarrhea causes dehydration and contributes to malnutrition.
