### **serotonin current aspects of pdf**

5-hydroxytryptamine receptors or 5-HT receptors, or serotonin receptors, are a group of G protein-coupled receptor and ligand-gated ion channels found in the central and peripheral nervous systems. They mediate both excitatory and inhibitory neurotransmission. The serotonin receptors are activated by the neurotransmitter serotonin, which acts as their natural ligand.

Serotonin, auch 5-Hydroxytryptamin (5-HT) oder Enteramin, ist ein Gewebshormon und Neurotransmitter. Es kommt unter anderem im Zentralnervensystem, Darmnervensystem, Herz-Kreislauf-System und im Blut vor. Der Name dieses biogenen Amins leitet sich von seiner Wirkung auf den Blutdruck ab: Serotonin ist eine Komponente des Serums, die den Tonus (Spannung) der Blutgefäße reguliert.

The serotonin 1A receptor (or 5-HT 1A receptor) is a subtype of serotonin receptor (5-HT receptor) that binds the neurotransmitter serotonin (5-hydroxytryptamine, 5-HT). It is a G protein-coupled receptor (GPCR), coupled to the Gi protein, that mediates inhibitory neurotransmission. The serotonin 1A receptor is encoded by the HTR1A gene.
