Service Oriented Architecture vs. Enterprise Architecture

Definizioni esistenti. Una Service-Oriented Architecture "progettata per il collegamento a richiesta di risorse computazionali (principalmente applicazioni e dati), per ottenere un dato risultato per gli utenti, che possono essere utenti finali o altri servizi. L'Organization for the Advancement of Structured Information Standards (Organizzazione per lo sviluppo di standard sull'informazione ...

Service-oriented architecture - Wikipedia

1.4.1 Agents and Services. A Web service is an abstract notion that must be implemented by a concrete agent. (See Figure 1-1) The agent is the concrete piece of software or hardware that sends and receives messages, while the service is the resource characterized by the abstract set of functionality that is provided.

Web Services Architecture - World Wide Web Consortium

In software engineering, a resource-oriented architecture (ROA) is a style of software architecture and programming paradigm for supportive designing and developing software in the form of Internetworking of resources with "RESTful" interfaces. These resources are software components (discrete pieces of code and/or data structures) which can be reused for different purposes.

"This book provides a comprehensive exploration of the concepts and mechanics behind clouds. It's written for anyone interested in delving into the details of how cloud envi-

Cloud Computing: Concepts, Technology & Architecture

An enterprise service bus (ESB) implements a communication system between mutually interacting software applications in a service-oriented architecture (SOA). It implements a software architecture as depicted in the picture. As it implements a distributed computing architecture, it implements a special variant of the more general client-server model, wherein, in general, any application using ...

Enterprise service bus - Wikipedia

The foundation of microservice architecture (MSA) is about developing a single application as a suite of small and independent services that are running in their own process, developed and deployed independently.

Last Updated: Survey of Architecture Frameworks. The specification of architecture frameworks is one area of standardization in ISO/IEC/IEEE 42010:2011 (the international revision of IEEE 1471:2000).. WG42 is collecting examples of architecture frameworks, listed below. Items in grey are entries in progress and should not be considered definitive at this time.

Serviceorientierte Architektur (SOA, englisch service-oriented architecture), auch dienstorientierte Architektur, ist ein Architekturmuster der Informationstechnik aus dem Bereich der verteilten Systeme, um Dienste von IT-Systemen zu strukturieren und zu nutzen. Eine besondere Rolle spielt dabei die Orientierung an Geschäftsprozessen, deren Abstraktionsebenen die Grundlage für konkrete ...
