The main user categories of district heating are industries and buildings according to Fig. 1. During 2014, these customers bought 11,5 EJ of heat from district heating activities in the energy sector according to the IEA energy balances. Russia, China, and the European Union were responsible for 85% of these heat deliveries.

Raman-based distributed temperature sensors are now used in a wide variety of industrial and scientific applications. In this paper, we set out the physical principles behind these systems and we summarise the many approaches to their design, the relevant parameters, and the significant features of employed schemes such as optical time- or frequency-domain reflectometry, with resulting ...

TagItSmart is about a "Smart Tags driven service platform for enabling ecosystems of connected objects". IoT is about connecting objects, things, devices, billions of them, and not only the obvious ones like smart phones, TVs, cameras, or the usual examples of objects like cars, homes, fridges, coffee machines, kettles, glasses etc.
