Solving equations using logs mc-logs4-2009-1 We can use logarithms to solve equations where the unknown is in the power as in, for example, $4x = 15$. Whilst logarithms to any base can be used, it is common practice to use base 10, as these

Solving linear equations cross number. Level of equations includes: Unknown on both sides Expanding single brackets Fractional coefficients...

Solving Linear Equation Cross Number by wibble73

The solution is not ordinarily obtained by computing the inverse of 7, that is $7^{-1} = 0.142857...$, and then multiplying 7^{-1} by 21. This would be more work and, if 7^{-1} is represented to a finite number of digits, less accurate. Similar considerations apply to sets of linear equations with more than one unknown; MATLAB ® solves such equations without computing the inverse of the matrix.

Systems of Linear Equations - MATLAB & Simulink

Multi-Step Equations Relay Race Activity My students absolutely loved this activity, and I had each group competing for free homework passes, so they were that much more motivated. I put the students in groups of 4 and assigned them each a number 1 - 4. I placed the worksheet on person #1's desk to...

Completing the square can be used to derive a general formula for solving quadratic equations, called the quadratic formula. The mathematical proof will now be briefly summarized. It can easily be seen, by polynomial expansion, that the following equation is equivalent to the quadratic equation: $(x + a)^2 = b^2$. Taking the square root of both sides, and isolating x, gives:
