

special laser pain therapy pdf

Low-level laser therapy (LLL) is a form of medicine that applies low-level (low-power) lasers or light-emitting diodes (LEDs) to the surface of the body. Whereas high-power lasers are used in laser medicine to cut or destroy tissue, it is claimed that application of low-power lasers relieves pain or stimulates and enhances cell function.. The effects of LLL appear to be limited to a ...

Low-level laser therapy - Wikipedia

Introduction This article is about red and near-infrared light therapy for healing recent injuries and a few other possible things like fibromyalgia pain, dementia, retinal injuries, and wrinkles.

LED Light Therapy - Heel spurs, plantar fasciitis, heel pain

Light therapy or phototherapy, classically referred to as heliotherapy consists of exposure to daylight or to specific wavelengths of light using polychromatic polarised light, lasers, light-emitting diodes, fluorescent lamps, dichroic lamps or very bright, full-spectrum light. The light is administered for a prescribed amount of time and, in some cases, at a specific time of day.
