Baltic iron and the British iron industry in the eighteenth century<sup>1</sup>. By CHRIS EVANS, OWEN JACKSON, and GOÄ" RAN RYDEÄ" N. The central role of the iron industry in Britainâ€™s industrialization is a textbook commonplace. Iron was one of those sectors in which indisputably revolutionary changes took place.

Updated July 08, 2018. Iron was one of the most basic requirements of the rapidly industrializing British economy, and the country certainly had plenty of the raw materials. However, in 1700 the iron industry was not efficient and most iron was imported into Britain; by 1800, after technical developments, the iron industry was a net exporter.

British business interests were split on colonial iron: manufacturers appreciated the lower prices due to colonial imports, but the British iron and steel industry objected to the competition. Parliament compromised in the Iron Act of 1750, which eliminated the import duty on colonial pig iron, but barred the manufacture of steel or of iron ...
