A Quantum Adventure. Chen-Lung also asked me to make it clear that his research has important real-life applications, should someone from NSF, who funds his work, happen to be reading this blog. Chen-Lung's work with Prof. Jeff Kimble of Caltech's IQIM is the subject of the third installment in our animated series of explanations of Quantum concepts and devices.

The fascination of the quantum world in two free downloadable pdf books. The quantum of action, the

smallest possible change in nature, leads to wave functions, probabilities, tunnelling and to all colours around us. The volume is a simple and appealing introduction to quantum mechanics, with all its fascination and its paradoxes. It explains the Schrödinger equation and the behaviour of quantum particles.

Motion Mountain - Volumes IV and V: Quantum Physics

how quantum systems behave for strong coupling, and in any event certainly I myself never have become such an expert. I have learned quite a bit while always feeling like a beginner. In 1976, I completed my Ph.D. at Princeton University, and moved to Harvard University for what proved to be four years of postdoctoral work.

ADVENTURES IN PHYSICS AND MATH

Have you ever asked: Why do people, animals, things, images and space move? The answer leads to many adventures; this volume presents those due to the discovery that there is a smallest change value in nature. This smallest change value, the quantum of action, leads to what is called quantum physics.

The Adventure of Physics - Vol. IV: The Quantum of Change

Hopefully, those of you watching will get some understanding of some key Quantum concepts and what it takes to build and manipulate Quantum systems, but to be honest, I make these videos because I think the work is really cool. Jeff and Chen-Lung: thanks for taking us along on this adventure of yours, the privilege is all ours.
