

time in its flight pdf

A time-of-flight camera (ToF camera) is a range imaging camera system that employs time-of-flight techniques to resolve distance between the camera and the subject for each point of the image, by measuring the round trip time of an artificial light signal provided by a laser or a LED. Laser-based time-of-flight cameras are part of a broader class of scannerless LIDAR, in which the entire scene ...

Time-of-flight camera - Wikipedia

Time of flight (ToF) is the measurement of the time taken by an object, particle or wave (be it acoustic, electromagnetic, etc.) to travel a distance through a medium. This information can then be used to establish a time standard (such as an atomic fountain), as a way to measure velocity or path length, or as a way to learn about the particle or medium's properties (such as composition or flow ...

Time of flight - Wikipedia

Description . Official evaluation module for the second-generation 3D Time-of-Flight (ToF) sensor from Texas Instruments. The Camera Development Kit (CDK) showcases the high-performance QVGA (320 x 240) resolution 3D ToF OPT8241 with its companion ToF controller OPT9221.
