Scientific opinion on climate change is a judgment of scientists regarding the degree to which global warming is occurring, its likely causes, and its probable consequences.. A related "but not identical" term, "scientific consensus on climate change", is the prevailing view on climate change within the scientific community. The consensus is that: Earth's climate has warmed significantly ...

### **Scientific opinion on climate change - Wikipedia**

Climate change mitigation consists of actions to limit the magnitude or rate of long-term global warming and its related effects. Climate change mitigation generally involves reductions in human (anthropogenic) emissions of greenhouse gases (GHGs). Mitigation may also be achieved by increasing the capacity of carbon sinks, e.g., through reforestation. ...

This guide seeks to provide a starting point for newcomers to help them see the "big picture" of the United Nations (UN) climate change regime, which is at the forefront of international action to combat climate change with its three major legal instruments – the UN Framework Convention on Climate Change, the Kyoto Protocol and the Paris Agreement.

### **UNFCCC eHandbook - Startpage**

Climate change is one of the most important global issues of our time; the rise of greenhouse gas (GHG) emissions has already started to impact our sector. Following the IPCC report released in October 2018, we believe society must not only start to adapt to our changing climate, but that land management is a key element in both stopping emissions and capturing CO<sub>2</sub>.

Under the Paris Agreement, for the first time climate action was anchored in the context of international law. This requires countries to make their own unique contribution to the prevention of dangerous climate change. The next crucial step to follow this agreement is the rapid implementation by the signing parties of concrete measures to make their individual contributions to the global goal.

What is your position on the climate-change debate? What would it take to change your mind? If the answer is It would take a ton of evidence to change my mind, because my understanding is that the science is settled, and we need to get going on this important issue, that's what I thought, too. This is my story.

1. Introduction. How to adapt cities to climate change is emerging as one of the greatest challenges that spatial planners will face in the 21st Century (Measham et al., 2011, Perry, 2015). Planning scholars have responded to this challenge by articulating a range of potential responses through both adaptation and mitigation.
