This book fills a gap at the interface of fundamental and clinical immunology, and allergy. For many years, experts in fundamental immunology and physicians involved in clinical immunology and allergy worked separately “ but the fundamental immunologists did not have medical qualifications and the physicians were not involved in the field of fundamental research.

ONLINE COVER Superagonist Autoantigen. Featured on the cover is a computer-generated illustration of a 3D protein structure showing the  $\alpha$  and  $\beta$  chains of a human T cell receptor (TCR) recognizing a high-affinity ligand formed by binding of a modified insulin B-chain peptide to the major histocompatibility complex (MHC) class II antigen HLA-DQ8.

### **Science Immunology**

Immunology is a branch of biology that covers the study of immune systems in all organisms. Immunology charts, measures, and contextualizes the physiological functioning of the immune system in states of both health and diseases; malfunctions of the immune system in immunological disorders (such as autoimmune diseases, hypersensitivities, immune deficiency, and transplant rejection); and the ...

Antibody fragments of predetermined binding specificity have recently been constructed from repertoires of antibody V genes, bypassing hybridoma technology and even immunization. The V gene repertoires are harvested from populations of lymphocytes, or assembled in vitro, and cloned for display of associated heavy and light chain variable domains on the surface of filamentous bacteriophage.
