In a group of animals (usually a litter of animals born in multiple births), a runt is a member which is smaller or weaker than the others. Owing to its small size, a runt in a litter faces obvious disadvantage, including difficulties in competing with its siblings for survival and possible rejection by its mother.

Volunteer! Many conservation organizations depend on volunteers in the U.S. and abroad. Do a web search to find an organization near you. Wild animals do not make good pets and it is illegal to buy endangered species. Do your research before making a decision to buy a pet and do not buy anything from a wildlife trafficker.

We see climate change everywhere - in weather patterns, across farmland, throughout plant and animal habitats. Scientists are documenting the effects of such climate-related shifts, which largely stem from global warming caused by humans and are already affecting daily life. In fact, 2015 to 2018 were the four hottest years ever recorded.
