A covalent bond, also called a molecular bond, is a chemical bond that involves the sharing of electron pairs between atoms. These electron pairs are known as shared pairs or bonding pairs, and the stable balance of attractive and repulsive forces between atoms, when they share electrons, is known as covalent bonding. [better source needed] For many molecules, the sharing of electrons allows ...

Pyruvate dehydrogenase is the first component enzyme of pyruvate dehydrogenase complex (PDC). The pyruvate dehydrogenase complex contributes to transforming pyruvate into acetyl-CoA by a process called pyruvate decarboxylation. Acetyl-CoA may then be used in the citric acid cycle to carry out cellular respiration, so pyruvate dehydrogenase contributes to linking the glycolysis metabolic pathway ...

Pyruvate dehydrogenase - Wikipedia

In addition to these severe technical demands, the highest priority from a purely societal viewpoint is the need for a hydrogen storage material to be non-hazardous, non-toxic, inert (to air and ...

1. Introduction. As treatments for bone disorders and defects have increased in recent years due to the aging population, there is a growing need for the use of synthetic materials as effective scaffolds for bone tissue regeneration .Tissue scaffolds are 3D structures meant to facilitate, and in some cases promote, tissue growth .In recent years, tissue scaffolds have been made of several ...
